Subject/Objet : CBA for CNS/ATM implementation in Spain

Dear Mr. Diaz,

My name is Burhan Ocakoglu and I am responsible for training in the field of GNSS and ATN at the Eurocontrol Institute of Air Navigation Services. In my course programme, I am talking, inter alia about the FANS CNS/ATM Concept and the benefits we can derive from it. In that context, I have followed the presentation you have made last October at the SNA-SG meeting of the Cost Benefit Analysis study for the implementation of the FANS concept in Spain. I think it would be very useful as a case study for the presentation of the FANS concept.

Would you agree that we use your study as a support of our training material ? If yes, would it, please, be possible to receive 2 copies of your CBA study (including the Executive summary and the full report)

My full address is the following:
